-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Claims 1-12 are allowed.
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

- a. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Korabiak in view of Caine and Oldenburg.

Korabiak discloses a vehicle lighting system comprising clustered lights 12,16,20 on either side of the rear of a vehicle, with brake light 28 and reverse lights 24,26 centrally located between the clustered lights, except for specifically stating that the clustered lights are multi-directional, or that lights are mounted on the bumper.

Caine teaches desirability of mounting vehicle signal lights on a rear bumper 18.

Oldenburg teaches desirability of using multi-directional clustered signal lights 42,44.

It would have been obvious to use multi-directional signal lights as suggested by Oldenburg and bumper mounting location as suggested by Caine in conjunction with a vehicle signal light system as disclosed by Korabiak, in order to allow viewers to the side of a vehicle to determine direction of movement and to provide for more economical mounting by not having to form signal mounts in the vehicle body.

Art Unit: 2636

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kouchi, Willaredt and Williams disclose vehicle signal light systems.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brent A Swarthout whose telephone number is 571-272-2979.
